

Haoyang Zheng

PH.D. CANDIDATE AT PURDUE UNIVERSITY | MACHINE LEARNING & AI RESEARCHER

✉ zheng528@purdue.edu | 🏠 haoyangzheng.github.io | 🌐 github.com/haoyangzheng-ai | 📄 [haoyangzheng](#) | 🎓 Scholar

Education

Purdue University, College of Engineering

Ph.D. in Mechanical Engineering (advised by Prof. Guang Lin, GPA 4.0/4.0)

West Lafayette, IN

Jun. 2021 - Dec. 2026 (Expected)

Purdue University, College of Engineering

M.S. in Mechanical Engineering (GPA 3.8/4.0)

West Lafayette, IN

Sep. 2019 - May. 2021

Southwest University, School of Computer and Information Science

B.Eng. in Automation (advised by Prof. Yong Deng, Rank 1/92)

Chongqing, China

Sep. 2014 - Jun. 2018

Professional Experience

Google Research

Mountain View, CA

Google Research Intern

May. 2026 - Aug. 2026 (Expected)

- Developed novel algorithms to accelerate inference for **Diffusion Language Models** in on-device generative AI settings.
- Analyzed trade-offs among inference latency, memory footprint, and model accuracy under edge-device constraints.
- Benchmarked proposed methods on real-world, latency-sensitive generation tasks.

Xiaohongshu (RedNote) Inc, Humane Intelligence Lab (hi lab)

Beijing, China

ACE Intern Program / RedStar Intern

Dec. 2025 - Apr. 2026

- Contributed to the **SFT data distillation pipeline** for a **multimodal image-editing model** by building scalable **OCR/VLM**-based data processing and **recaptioning** workflows, extracting text-rich regions, and enriching samples with multimodal captions.
- Built **teacher-assisted data generation** workflows that synthesized bilingual, multi-type **image-editing instructions** from OCR/VLM signals and used **Qwen-Image-Edit** and **Nano Banana** to generate edited images at scale with distributed processing.
- Designed automated **quality control** for distilled SFT samples using taxonomy-based quality tagging, semantic/aesthetic/perceptual metrics, and consistency checks; validated the distilled data through QA tools and **post-training evaluations** on pretrained checkpoints.

Argonne National Laboratory, Mathematics and Computer Science Division

Lemont, IL

Givens Associate

May. 2023 - Jul. 2023

- Proposed scalable **Proximal Policy Optimization (PPO)** algorithms integrated with Bayesian optimization in control tasks.
- Developed AI-enhanced modeling and simulation pipelines for physical systems by combining machine learning with PDE solvers.

Research Interests

I study **Generative Modeling** and **Reinforcement Learning** (RL) from a probabilistic modeling perspective. My interests include **LLMs**, continuous and discrete diffusion, RL, and sampling/optimization methods that improve latency and robustness.

My recent work on **discrete diffusion distillation** achieves over **60×** faster language generation than GPT baseline with similar quality. This research direction naturally extends to a range of emerging domains, including multimodal diffusion, code generation, reasoning models, etc. I am also interested in scaling these methodologies to larger LLM and MoE architectures, where improving efficiency and stability remains a central challenge. My long-term goal is to enable next-generation large-scale models that achieve both extreme efficiency and the reliability needed for practical, real-world use.

Papers

Large Language Models

Talks

- [1] On Sampling Tasks with Langevin Dynamics, Brown University, July 2024. Host: George Em Karniadakis.
- [2] Ultra-Fast Language Generation via Discrete Diffusion Divergence Instruct, Peking University, January 2026. Host: He Sun.
- [3] Ultra-Fast Language Generation via Discrete Diffusion Divergence Instruct, Brown University, January 2026. Host: George Em Karniadakis.

[4] Exploring Non-Convex Discrete Energy Landscapes: A Langevin-Like Sampler with Replica Exchange, January 2026, on AAAI 2026, at Singapore

Posters

[1] Reflected Replica Exchange Stochastic Gradient Langevin Dynamics, September 2024, on [Mathematical and Scientific Foundations of Deep Learning Annual Meeting \(Simons Foundation\)](#), at New York, NY.

[2] Accelerating Thompson Sampling with Underdamped Langevin Monte Carlo, October 2024, on [SIAM Conference on Mathematics of Data Science](#), at Atlanta, GA.

[3] On Thompson Sampling with Underdamped Langevin Monte Carlo, September 2023, on [Mathematical and Scientific Foundations of Deep Learning Annual Meeting \(Simons Foundation\)](#), at New York, NY.

Achievements

SELECTED AWARDS

2025	Student Travel Awards , Simons Foundation , 2025 MoDL	<i>New York, NY</i>
2024	Student Travel Awards , Simons Foundation , 2024 MoDL	<i>New York, NY</i>
2024	Student Travel Awards , SIAM Conference on MDS24	<i>Atlanta, GA</i>
2024	Student Travel Awards , Nonlocality: Challenges in Modeling and Simulation	<i>Providence, RI</i>
2023	Student Travel Awards , Simons Foundation , 2023 MoDL	<i>New York, NY</i>
2018	Pacemaker to Technological Innovation in Chongqing , awarded 10 undergraduate every two years	<i>Chongqing, China</i>
2018	Outstanding undergraduates in Chongqing , awarded 1% undergraduate every year	<i>Chongqing, China</i>
2015	China National Scholarship , awarded 1% undergraduates every year	<i>China</i>

SELECTED HONORS

2017	Finalist (0.5%) , Interdisciplinary Contest in Modeling	<i>China</i>
2016	Special prize (2/3568) , International Mathematical Contest in Modeling	<i>China</i>

Service

Conference Reviewer	ICLR, ICML, NeurIPS, AISTATS, KDD, AAAI
Journal Reviewer	IEEE Transactions on Pattern Analysis and Machine Intelligence (TPAMI), IEEE Transactions on Neural Networks and Learning Systems (TNNLS), IEEE Transactions on Cybernetics (TCYB), IEEE Transactions on Multimedia (TMM), Transactions on Machine Learning Research (TMLR), SIAM Multiscale Modeling and Simulation, Journal of Computing and Information Science in Engineering, Journal of Supercomputing, Scientific Reports, Knowledge and Information Systems

Skills & Tools

Machine Learning	Generative Modeling, Reinforcement Learning, Bayesian Optimization, Sampling
ML/DL Frameworks	PyTorch, DDP, FSDP2, vllm, OpenAI Gym, HuggingFace
Programming Languages	Python, Bash, MATLAB
Uncertainty Quantification	Bayesian Inference, Langevin Dynamics, MCMC
